CONCAVE DOORS

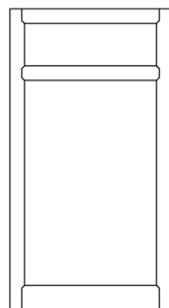

STANDARD DOORS & GEORGIAN FRAMES

Standard door and Georgian Frame designs differ according to door style. Here we show illustrations representative of each individual door and frame design and which door style they belong to. All Georgian Frames are supplied with glass as standard.

Illustrations shown are representative of 770 high Georgian Frames. Frame sizes higher than 770 will increase the number of horizontal bars and glass panes included in the frame, e.g. 770mm = 2 bars / 900mm and above = 3 bars

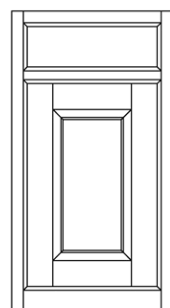

AURORA

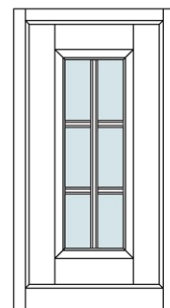

Please note: there is no Georgian Frame available for the Aurora door. Plain Frame available.

CARVED FRAMES

Carved frames will generically have a square inside profile, no matter what type of moulding is used on the inside of the doors.

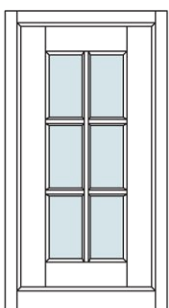

GLASS

Glass is included in all carved frames as standard. If you require your frames without glass, please state this clearly on your order form and a reduction will be applied to the list price.

DOOR MATRIX

- These setting out dimensions are based on 30mm thick worktops.
- All dimensions shown are in millimetres.
- All dimensions here refer to fascia sizes unless stated otherwise.
- Check individual range contents for availability of specific fascia sizes & door types.
- Studio unit & tower unit options are shown on the next page.
- With appliances, follow the manufacturer's installation instructions, particularly for hob-to-extractor/hood distances & ventilation.
- Please refer to individual range pages for definitive list of sizes.
